

## Toner Cartridge, Inkjet Cartridge & Mobile Phone Charity Collection & Recycling Program

Takeback Ltd in conjunction with its supported charities specialises in the free collection of used toner and inkjet cartridges that are used in most of today's mainstream printers, fax machines and multifunction copier/fax/scanner devices in addition to mobile phones.

Unfortunately modern technology creates waste and the computer and telecoms industries are no exception. Currently millions of tonnes of non-degradable plastic go to landfill each year in the form of mobile phones, inkjet and toner cartridges, much of which could be recycled given the opportunity, which is where Takeback can help.

Put simply, Takeback offers a free cartridge collection service providing you have a minimum of twenty qualifying cartridges or mobile phones and our supported charities will benefit too!

*"Takeback therefore has a hugely positive effect on the environment, over the years it has saved millions of cartridges from going to landfill, a great legacy for future generations."*

### ● Why choose Takeback?

Takeback are long established collectors of empty cartridges. Takeback specialise in collecting these cartridges and mobile phones from businesses, schools, scout/guide groups, stationery/computer dealers and many other industry sectors throughout the UK. Takeback have the infrastructure to collect these cartridges and mobile phones quickly and effectively and importantly also have the required waste licenses from the Environment Agency to allow it to do so, therefore fulfilling your own duty of care responsibilities to dispose of your used cartridges correctly.

### ● Takeback will pay for your empty cartridges, not just offer promises or prizes!

Takeback work in conjunction with many charities and over the years has donated well needed funds to hundreds of different charities. When you participate in Takeback's collection program, Takeback will make a donation to its supported charities for the cartridges and phones you return and send you a certificate to confirm and thank you for your kind support along with a waste transfer note.

● **Which charities does Takeback support?** Takeback have supported many charities over the years and this year we are proud to support three more great charities:

**Rainbows Children's Hospice** – at Rainbows the emphasis is on enriching life and making each minute of each short life count. Children and young people with life-limiting and life-threatening conditions come to the Hospice for specialist respite stays, symptom management, palliative and end-of-life care. Their families too are supported and helped by Rainbows on their difficult journey.

**World Horse Welfare** – the recent high profile campaign by Emmerdale actress Claire King has helped shout the message of the World Horse Welfare who strive to stop the suffering of horses today through the rescue, rehabilitation and re-homing and help prevent the suffering of horses tomorrow, through campaigning, educating and training.

**Jeans for Genes** – their mission is to change the world for children with genetic disorders by funding research into the causes and cures of genetic conditions and by providing vital funding for care and support.

At Takeback we have supported Jeans for Genes through their infamous Jeans for Genes dress down days in our own office, but that is just one day a year, and as one of our supported charities we hope to be able to help them every day of the year!

● **Which cartridges do Takeback collect?** There are several hundred cartridges that Takeback are able to collect free of charge, a list of the current qualifying cartridges follows. If you only have small quantities of inkjet cartridges (the little ones) or mobile phones then we can send Freepost bags for you to simply put these in and post them back free of charge. Takeback does not remanufacture any cartridges itself, it just specialises in the recovery of these used cartridges. To that end not only does it collect a far wider range of cartridges than any one individual remanufacturer but also Takeback promises not to try and sell you a new cartridge back!

- **What do Takeback do with these cartridges?**

Takeback collect these cartridges and bring them back to their cartridge processing centre in Thetford, Norfolk. All the cartridges are then visually inspected and separated into their various types and then sold to companies that will remanufacture them. Therefore as these cartridges have most value for re-use rather than to just be recycled, it is important that they are received undamaged so as to achieve maximum value.

Takeback's customers or sent for specialised recycling which separates the plastics and metals enabling the materials to be used again in other walks of life. Used cardboard and paper is fully recycled and boxes are re-used again where possible. Takeback therefore has a hugely positive effect on the environment, over the years it has saved millions of cartridges from going to landfill, a great legacy for future generations.

- **What mobile phones do Takeback collect?**

Takeback collect all mobile phones regardless of make or model. There is no need to send the chargers with them but as with the cartridges it is key that they are received in as good a condition as possible.

- **Does anything go to landfill?** Takeback strives to achieve minimal waste to landfill. Those cartridges that are damaged and can not be sold as complete units are either used as spare parts by

We look forward to hearing from you,  
**The Takeback Collections Team**

By recycling with Takeback today, you will make a positive impact on our world of tomorrow, please contact Takeback's collection team:
